Elkhart, IN USA

EXACT-SLIDE™

WITH EMFORCE™ TECHNOLOGY

BAL, the industry leader in cable slide technology, has raised the bar again with the introduction of the EXACT-SLIDE™ with EMFORCE™ technology. Precision control with a water resistant seal through exact design and manufacturing put the EXACT-SLIDE™ in a class of its own. Two motors are hidden within the jambs to simplify assembly and minimize trim and fascia interference. Each side of the room is independently controlled by BAL's patent pending EMFORCE™ technology, ensuring uniform movement and regulated sealing on the first and every cycle. BAL's EXACT-SLIDE™ is the latest addition to our full line of slide-out mechanisms to support your design requirements. For additional information regarding the EXACT-SLIDE™ or other BAL products, please visit www.balrvproducts.com.

- » Motors hidden within wall jambs
- » Electronic controller with EMFORCE™ technology
- » Four corner repeatable uniform room sealing
- » Simplified and robust wiring
- » Flush floor capability
- » Built in manual override
- » Lightweight

Drive mechanism is fully
concealed within
the wall jambs

U.S. PATENT PENDING
