PAIRING TO THE NODE

Pairing your **CONTROLLER**, smartphone or tablet to the **NODE**, is done in three easy steps and the **APP** will guide you through the pairing process.

NOTE: The **CONTROLLER** will have been paired to your **NODE** at the factory. You should only need to pair your own device or smartphone to the **NODE**.

While the **NODE** can be paired to a total of four devices (including the **CONTROLLER**), you can only pair one device at a time to the **NODE**.

1. Launch the **APP** on your phone
2. Using the < or > button on the **CONTROLLER**, navigate to the “PA” menu item
3. When “PA” appears on the display, press the EXT button to start the pairing process to the **NODE**, “PA” will blink for a maximum of 30 seconds or until a device is connected.

Figure 3: Press EXT once, to start the pairing process

CANNOT PAIR TO THE NODE

When pairing a mobile device to the **NODE** and "--" appears on screen, it is mostly likely that four devices are connected to the **NODE** simultaneously. To resolve this, either

- Close the app on one of the devices that are connected to the **NODE** and try again, OR
- Clear the memory of the **NODE** of all the previously paired devices.

Figure 4: Failed to connect

CLEARING NODE OF ALL PREVIOUSLY PAIRED DEVICES

WARNING

Clearing the **NODE** memory will also clear the pairing between the **NODE** and **CONTROLLER**. After clearing, the **CONTROLLER** will need to be paired to the **NODE** again.

1. Go to the **APP** General Settings and click on Bluetooth Connection
2. Press Unpair RV, to unpair the **CONTROLLER** from the **NODE**

Figure 5: Unpairing a mobile device from the **NODE**

3. Navigate to the "PA" function on the **CONTROLLER** display
4. Press and hold the EXT button until the number 1 scrolls across the **CONTROLLER** display. The **NODE** is now clear of all connected devices.

Figure 6: Go to PA, then Press and hold EXT until the number 1 scrolls across the **CONTROLLER**

5. Pair the **CONTROLLER** to the **NODE** again. Please refer to the **Pairing to the NODE**.
6. Pair the new device to the **NODE**, (please refer to the **Pairing to the NODE**).

After pairing successfully completes, you will see the home screen of the **APP**

The Bluetooth icon  will appear in the indicated location
