Assembly

Notes and Maintenance

Before you begin installation, read all instructions thoroughly.

Proper tools will improve the quality of installation and reduce the time required.

Distribute the weight evenly on the platform when hauling a load. This carrier is not intended for transporting people.

Do not carry loads wider or deeper than the carrier.

Mild automotive detergent may be used to clean the product. Do not use dish detergent, abrasive cleaners, abrasive pads, wire brushes or other similar products that may damage the finish.

Step 1

Place the cargo carrier frame (#1) on a flat surface facing down.

Align the mounting holes in the support bracket (#2) with the holes in the carrier frame. Place an M10 eye bolt (#3) through the support bracket and carrier frame.

Place a U-clamp (#4) onto the M10 eye bolt and secure with an M10 lock nut (#5).

Repeat for all attachment points.

Tighten all M10 hardware to 12 ft-lbs.

Note: Overtightening hardware may cause damage to product or hardware.

Once assembled, insert the shank into the receiver tube of the tow vehicle and align the holes. Secure with a pin & clip (not included).
