**SPECTRUM™
BRAKE CONTROLLER**

The innovative CURT Spectrum™ brake controller regulates all brake settings with a simple push-button rotary knob. It features a clean, dash-mounted, OEM-style design with 10 tri-color LEDs. Meanwhile the main module can be mounted out of sight. This allows the Spectrum™ to integrate with the vehicle unlike any other brake controller on the market.

Dynamic power adjustment

Automatic power increase for decline

Key Features

Controls all brake settings with a simple push-button rotary knob

Main module can be mounted out of sight for a consistent OE look

Clean, dash-mounted, OEM-style user interface with 10 tri-color LEDs

Easily accessible manual override with the press of a button

As easy as push, turn and go

The LED display shows the output setting when the controller is activated, allowing for intuitive monitoring. There are four modes of operation and three indicator sequences. Pressing the controller knob switches between modes.
