HCM 300 Gallon Sprayer

OPERATOR MANUAL

INTRODUCTION

Thank you for purchasing a Demco sprayer. We feel you have made a wise choice and hope you are completely satisfied with your new piece of equipment.

If you have any questions regarding the applications of certain solutions or chemicals, contact your chemical supplier and follow chemical manufacturer recommendations as well as all licensing and use restrictions or regulations.

Please read and understand this manual before operation.

WARRANTY POLICY, OPERATOR MANUALS, PARTS MANUALS & REGISTRATION

Go online to www.demco-products.com to review Demco warranty policies, operator manuals and register your Demco product.

WARNING: TO AVOID PERSONAL INJURY OR PROPERTY DAMAGE, OBSERVE THE FOLLOWING INSTRUCTIONS:

Chemicals are dangerous. Know exactly what you're going to do and what is going to happen before attempting to work with these products. Improper selection or use can injure people, animals, plants and soil.

Always wear protective clothing such as coveralls, goggles and gloves when working with chemicals or the sprayer.

Be sure to dispose of all unused chemicals or solutions in a proper and ecologically sound manner.

GENERAL INFORMATION

1. Unless otherwise specified, high-strength (grade5) (3 radial-line head markings) hex head bolts are used throughout assembly of this piece of equipment.
2. Whenever terms **"LEFT"** and **"RIGHT"** are used in this manual it means from a position behind the sprayer and facing forward.
3. When placing a parts order, refer to this manual for proper part numbers and place order by **PART NO. AND DESCRIPTION.**
4. All reference numbers used in the assembly instructions of the sprayer main frame correspond with the reference numbers in the HCM Main Parts List.

TAKE NOTE! THIS SAFETY ALERT SYMBOL FOUND THROUGHOUT THIS MANUAL IS USED TO CALL YOUR ATTENTION TO INSTRUCTIONS INVOLVING YOUR PERSONAL SAFETY AND SAFETY OF OTHERS. FAILURE TO FOLLOW THESE INSTRUCTIONS CAN RESULT IN INJURY OR DEATH!

**THIS SYMBOL MEANS
ATTENTION
BECOME ALERT
YOUR SAFETY IS INVOLVED!**

SIGNAL WORDS:

This manual uses the following signal words--**DANGER**, **WARNING**, and **CAUTION**-- with safety messages. The appropriate signal word has been selected using the following guidelines.

DANGER:

Indicates an imminently hazardous situation that, if not avoided, will result in death or serious injury. This signal word is to be limited to most extreme situations typically for machine components which, for functional purposes, cannot be guarded.

WARNING:

Indicates a potentially hazardous situation that, if not avoided, could result in death or serious injury, and includes hazards that are exposed when guards are removed. It may also be used to alert against unsafe practices.

CAUTION:

Indicates a potentially hazardous situation that, if not avoided, may result in minor or moderate injury. It may also be used to alert against unsafe practices.

If you have questions not answered in this manual, require additional copies, or if your manual is damaged, please contact your dealer or DEMCO, 4010 320th Street, Boyden, IA 51234
ph: (712) 725-2311 or Toll Free: 1-800-543-3626 Fax: (712) 725-2380 or 1-800-845-6420
<http://www.demco-products.com>

SAFETY...YOU CAN LIVE WITH IT

REMEMBER

Your best assurance against accidents is a careful and responsible operator. If there is any portion of this manual or function you do not understand, contact your local authorized dealer or manufacturer.

EQUIPMENT SAFETY GUIDELINES

Every year many accidents occur which could be avoided by a few seconds of thought and more careful approach to handling equipment. You, the operator, can avoid accidents by observing precautions in this section. To avoid personal injury, study precautions and insist those working with you, or you yourself, follow them.

Keep all shields in place. If shield removal becomes necessary for repairs, replace shield prior to use.

Replace any caution, warning, danger or instruction safety decal that is not readable or is missing.

Do not attempt to operate this sprayer under the influence of alcohol or drugs.

Review safety instructions with all users.

Operator should be a responsible adult. **DO NOT ALLOW PERSONS TO OPERATE OR ASSEMBLE THIS SPRAYER UNTIL THEY HAVE DEVELOPED A THOROUGH UNDERSTANDING OF SAFETY PRECAUTIONS AND HOW IT WORKS.**

To prevent injury or death, use a tractor equipped with a roll over protective system (ROPS). Do not paint over, remove, or deface any safety signs or warning decals on your sprayer. Observe all safety signs and practice instructions on them.

Never exceed limits of sprayer. If its ability to do a job, or to do so safely is in question **DON'T TRY IT.**

LIGHTING AND MARKING

It is the responsibility of operator to know lighting and marking requirements of local highway authorities and to install and maintain equipment to provide compliance with regulations. Add extra lights when transporting at night or during periods of limited visibility.

Lighting kits are available from your dealer or manufacturer.

TIRE SAFETY

- Failure to follow proper procedures when mounting tire on rim can produce an explosion resulting in serious injury or death.
- Do not attempt to mount tire unless you have proper equipment and experience.
- Inflating or servicing tires can be dangerous. Whenever possible, trained personnel should be called to service or mount tires.
- Always order and install tires and wheels with appropriate type and load capacity to meet or exceed anticipated weight to be placed on sprayer.

BEFORE OPERATION:

- Carefully study and understand this manual and the Owner's Manual.
- Do not wear loose-fitting clothing which may catch in moving parts.
- Always wear protective clothing and substantial shoes.
- It is recommended that suitable hearing and eye protection be worn.
- Operator may come in contact with certain materials which may require specific safety equipment relative to handling of such materials. (Examples: extremely dusty, molds, fungus, bulk fertilizers, etc.)
- Keep wheel and lug nuts tightened to specified torque.
- Assure that agricultural implement tires are inflated evenly.
- Give sprayer a visual inspection for any loose bolts, worn parts, or cracked welds, and make necessary repairs. Follow maintenance safety instructions included in this manual.
- Be sure there are no tools lying on or in equipment
- Do not use sprayer until you are sure that area is clear, especially around children and animals.
- Don't hurry learning process or take sprayer for granted. Ease into it and become familiar with your new equipment.
- Practice operation of your sprayer and its attachments. Completely familiarize yourself and other operators with its operation before using.
- Use a tractor equipped with Roll Over Protection System (ROPS) and fasten your seat belt prior to starting engine.
- Manufacturer does not recommend usage of tractor with ROPS removed.
- Move tractor wheels to widest recommended settings to increase stability.
- Do not allow anyone to stand between tongue or hitch and towing unit when backing up to equipment.

**DURING OPERATION**

- Beware of bystanders, **PARTICULARLY CHILDREN!** Always look around to make sure it is safe to start engine of towing unit or move sprayer. This is particularly important with higher noise levels and quiet cabs, as you may not hear people shouting.
- **NO PASSENGERS ALLOWED**- Do not carry passengers anywhere on or in the tractor or sprayer.
- Keep hands and clothing clear of moving parts.
- Do not clean, lubricate, or adjust your sprayer while it is moving.
- When halting operation, even periodically, set tractor or towing unit brakes, disengage PTO, shut off engine, and **remove ignition key**.
- Be especially observant of operating area and terrain- watch for holes, rocks, or other hidden hazards. Always inspect area prior to operation.
 - DO NOT operate near edge of drop-offs or banks.
 - DO NOT operate on steep slopes as overturn may result.
 - Operate up and down (not across) intermediate slopes. Avoid sudden starts and stops.
- Pick the most level possible route when transporting across fields. Avoid edges of ditches, gullies, and steep hillsides.
- Be extra careful when working on inclines.
- Periodically clear equipment of brush, twigs, or other materials to prevent buildup of dry combustible materials.
- Maneuver tractor or towing unit at safe speeds.
- Avoid overhead wires or other obstacles. Contact with overhead lines could cause serious injury or death.
- Avoid loose gravel, rocks, and holes; they can be dangerous for equipment operation or movement.
- Allow for sprayer length when making turns.
- Do not walk or work under raised components or attachments unless securely positioned and blocked.
- Keep all bystanders, pets, and livestock clear of work area.
- Operate towing unit from operators seat only.
- Never stand alongside of unit with engine running or attempt to start engine and/or operate machine while standing alongside of unit.
- Never leave running equipment attachments unattended.
- As a precaution, always recheck hardware on equipment following every 100 hours of operationCorrect all problems. Follow maintenance safety procedures.

FOLLOWING OPERATION

- Following operation, or when unhitching, stop tractor or towing unit, set brakes, disengage PTO and all power drives, shut off engine and **remove ignition key**.
- Store sprayer in an area away from human activity.
- Do not park sprayer where it will be exposed to livestock for long periods of time. Damage and livestock injury could result.
- Do not permit children to play on or around the stored sprayer.
- Make sure all parked machines are on a hard, level surface and engage all safety devices.
- Wheel chocks may be needed to prevent unit from rolling.

HIGHWAY AND TRANSPORT OPERATIONS

- **SAFETY CHAINS:** If equipment is going to be transported on a public highway, always follow state and local regulations regarding safety chains and auxiliary lighting. Be sure to check with local law enforcement agencies for your own particular regulations. If required safety chains should be obtained and installed. Only safety chains (not elastic or nylon/plastic tow straps) should be used to retain connection between towing and towed machines in event of separation of primary attaching system. Use a high strength, appropriately sized hitch pin with a mechanical retainer and attach safety chains. Criss cross chains under tongue and secure to draw bar cage, mounting loops, or bumper frame.
- Adopt safe driving practices:
 - Keep brake pedals latched together at all times. **NEVER USE INDEPENDENT BRAKING WITH SPRAYER IN TOW. LOSS OF CONTROL OR UPSET MAY RESULT.**
 - Always drive at a safe speed relative to local conditions and ensure that your speed is low enough for an emergency stop. Keep speed to a minimum.
 - Reduce speed prior to turns to avoid risk of overturning.
 - Always keep tractor or towing unit in gear to provide engine braking when going downhill. Do not coast.
 - Do not drink and drive!
- Comply with state and local laws governing highway safety and movement of farm machinery on public roads.
- Use approved accessory lighting flags and necessary warning devices to protect operators of other vehicles on highway during transport. Various safety lights and devices are available from your dealer.
- Use of flashing amber lights is acceptable in most localities. However, some localities prohibit their use. Local laws should be checked for all highway lighting and marking requirements.
- When driving tractor and sprayer under 20 mph (40 kph) day or night, use flashing amber warning lights and a slow moving vehicle (SMV) identification emblem.
- Plan your route to avoid heavy traffic.
- Be a safe and courteous driver. Always yield to oncoming traffic in all situations, including narrow bridges, intersections, etc.
- Be observant of bridge load ratings. Do not cross bridges rated lower than gross weight of unit you are operating.
- Watch for obstructions overhead and side to side while transporting.
- Always operate equipment in a position to provide maximum visibility at all times. Make allowances for increased length and weight of sprayer when making turns, or stopping.

PERFORMING MAINTENANCE

- Good maintenance is your responsibility. Poor maintenance is an invitation to trouble.
- Make sure there is plenty of ventilation. Never operate engine of towing vehicle in a closed building. Exhaust fumes may cause asphyxiation.
- Before working on this machine, stop towing vehicle, set brakes, disengage PTO and all power drives, shut off engine and **remove ignition key**.
- Be certain all moving parts and attachments have come to a complete stop before attempting to perform maintenance.
- Always use a safety support and block wheels. Never use a jack to support machine.
- Always use proper tools or equipment for job at hand.
- Use extreme caution when making adjustments.
- Follow torque chart in owners manual when tightening bolts and nuts.
- Never use your hands to locate a hydraulic leak on attachments. Use a small piece of cardboard or wood. Hydraulic fluid escaping under pressure can penetrate skin.
- Openings in skin and minor cuts are susceptible to infection from hydraulic fluid. **Without immediate medical treatment, serious infection and reactions can occur.**
- When disconnecting hydraulic lines, shut off hydraulic supply and relieve all hydraulic pressure.
- Replace **all shields** and **guards** after servicing and before moving.
- After servicing, be sure all tools, parts and service equipment are removed.
- Do not allow grease or oil to build up on any steps or platform.
- When replacing bolts refer to owners manual.
- Refer to bolt torque chart in owners manual for head identification marking.
- Where replacement parts are necessary for periodic maintenance and servicing, genuine factory replacement parts must be used to restore your equipment to original specifications. Manufacturer will not claim responsibility for use of unapproved parts or accessories and other damages as a result of their use.
- If equipment has been altered in any way from original design, manufacturer does not accept any liability for injury or warranty.
- A fire extinguisher and first aid kit should be kept readily accessible while performing maintenance on this equipment.

SAFETY SIGN CARE

- Keep safety signs clean and legible at all times.
- Replace safety signs that are missing or have become illegible.
- Replacement parts that displayed a safety sign should also display current sign.
- Safety signs are available from your distributor, dealer parts department, or manufacturer.

How to install safety signs:

- Be sure installation area is clean and dry.
- Decide on exact position before you remove backing paper.
- Remove smallest portion of split backing paper.
- Align decal over specified area and carefully press small portion with exposed sticky backing in place.
- Slowly peel back remaining paper and carefully smooth remaining portion of decal into place.
- Small air pockets can be pierced with a pin and smoothed out using piece of decal backing paper.

SAFETY SIGN LOCATIONS

Types of safety sign and locations on a HCM Sprayer are shown in the illustration below. Good safety requires that you familiarize yourself with various safety signs, type of warning, and particular function related to that area, that requires your SAFETY AWARENESS.

- A AB21014 - Qty.1 Warning Observe Following Instructions**
- B AB21001 - Qty.1 Warning Do Not Stand on Sprayer**
- C AG21002 - Qty.1 Caution 20 M.P.H.**
- D AA21014 - Qty.1 Fresh Water Only**
- E AB21051 - Qty.2 Model HCM**
- F AA21077 - Qty. 2 Small Demco's**

(See Next Page for decal picture)

! WARNING

To prevent serious injury or death

- Refer to chemical supplier and manufacturer recommendations and all licensing restrictions or regulations.
- Always wear recommended protective clothing when working with chemicals or sprayer.
- Dispose of all unused chemicals or solutions in proper and ecologically sound manner. Improper use can injure people, animals, plants and soil.

TORQUE SPECIFICATION

Torque figures indicated are valid for non-greased or non-oiled threads and heads unless otherwise specified. Therefore, do not grease or oil bolts or capscrews unless otherwise specified in this manual. When using locking elements, increase torque values by 5%.

* GRADE or CLASS value for bolts and capscrews are identified by their head markings.

BOLT TORQUE DATA FOR STANDARD NUTS, BOLTS, AND CAPSCREWS.

Tighten all bolts to torques specified in chart unless otherwise noted. Check tightness of bolts periodically, using bolt chart as guide. Replace hardware with same grade bolt.

NOTE: Unless otherwise specified, high-strength Grade 5 hex bolts are used throughout assembly of equipment.

Bolt Torque for Standard bolts *						
"A"	GRADE 2		GRADE 5		GRADE 8	
	lb-ft	(N.m)	lb-ft	(N.m)	lb-ft	(N.m)
1/4"	6	(8)	9	(12)	12	(16)

LIST AND DESCRIPTION SEE
PAGE 24**

ASSEMBLY INSTRUCTIONS

1. Begin by resting the Frame (#28) on saw horses, barrels or some other solid object, so that the frame is about 36" off the ground.
2. Slide the Axle Tube (#14) through the Frame (#28) as shown.
3. Center the Axle Tube in the frame. Secure in place with one 1/2" square U-bolt (#5) and two nylon locknuts (#22) on each side.

TONGUE & HITCH INSTALLATION

ASSEMBLY INSTRUCTIONS

8. Fasten tongue (#4) to frame (#28) using ten 1/2" x 1-1/4" (#16) and two 1/2" x 1-1/2" (#17) bolts, and nylon locknuts (#22) on bottom side of tongue. Also add a 1/2" Flat washer (#3) to each hole on bottom side of tongue.

9. Fasten the Clevis Hitch (#7) to the tongue with six 1/2" x 1-1/4" hex head bolts (#16) and nylon locknuts (#22).

Final hitch adjustments should be made when sprayer is assembled and ready to be towed by the tractor. Tank and Frame should be level.

10. Attach jack (#35) to tongue (#4) using jack pin. **Turn jack to the down position.**

11. Remove the frame assembly from the sawhorses, allowing it to rest on the tires (not shown) and the jack.

Block the tires to prevent sprayer from rolling during the rest of the assembly.

*** FOR REFERENCE NUMBER LIST AND DESCRIPTION SEE PAGE 24**

TANK INSTALLATION

VIEW A

ASSEMBLY INSTRUCTIONS

12. Bolt the Plumbing Support (#20) to the front frame as shown using two 3/8" x 1-1/4" hex head bolts (#13) and nylon locknuts (#25).

13. Place the Tank (#44) in the frame as shown, making sure tank is well centered.

14. Secure the tank with the two heavy duty Tank Straps and Anchors (#38) using eight 3/8" x 5" full thread bolts (#21) and nylon locknuts (#26).

NOTE: Weave the strap through the anchor as shown in VIEW A.

ASSEMBLY INSTRUCTIONS

15. Bolt the Platform Mounting Brackets (#29) to the frame using four 1/2" x 1-1/4" hex head bolts (#16) and nylon locknuts (#22).

16. Bolt the Platform (#8) to the Mounting Brackets (#29) using four 3/8" x 1-1/4" hex head bolts (#13), flatwashers (#2) and nylon locknuts (#25).

17. Bolt the Step (#41) to the platform as shown using two 1/2" x 1-1/4" hex head bolts (#16) and nylon locknuts (#22).

18. Bolt the Safety Rail (#9) to the platform as shown using two 1/2" x 1-1/4" hex head bolts (#16) and nylon locknuts (#22). Mount wash tank bracket (#40) to front handrail (#9) with three 1/4" x 1" round U-bolts (#15), flat washers and nylon locknuts. Attach the eye wash tank with four bolts (#39), eight washers (#1) and lock nuts (#31).

*** FOR REFERENCE NUMBER LIST AND DESCRIPTION SEE PAGE 24**

TRUSS-T BOOM INSTALLATION

TRUSS-T BOOM PARTS LIST

REF. NO.	PART NO.	QTY.	DESCRIPTION
1.	02678-95	4	Boom Mounting Plate
2.	00523	4	3/8"-16 UNC x 1-1/4" Hex Head Bolt
3.	02592	4	3/8"-16 UNC Nylon Insert Locknut
4.	02802	8	5/16"-18 UNC Nylon Insert Locknut
5.	00004	8	5/16" Flatwasher
6.	00909	4	5/16"-18 UNC x 1-1/4" Square U-Bolt
7.	00967	6	1/2"-13 UNC x 1-1/4" Hex Head Bolt
8.	02693-76	2	Boom Mtg. Brace
9.	01792-76	2	23" Boom Mtg. Bracket
10.	02178	6	1/2"-13 UNC Nylon Insert Locknut

Please order replacement parts by PART NO. and DESCRIPTION.

ASSEMBLY INSTRUCTIONS

19. Begin by bolting on the Boom Mounting Plate (supplied with Truss-T Boom) using four 3/8" x 1-1/4" hex head bolts (#2) and nylon locknuts (#3). **NOTE: Use the hole to the inside of the mounting plate as shown.**

20. Attach the Truss-T Boom Center Section to the Mounting Plates using four 5/16" x 1-1/2" square u-bolts (#6), nylon locknuts (#4) and flatwashers (#5). (U-bolts and Locknuts are supplied with Truss-T Boom.)

NOTE: The boom mounting brackets and the boom center section may be mounted using any set of two holes depending on boom height desired.

NOTE: Always lock the Safety Stand in the down position when unhitching the sprayer and lock it in the up position before towing the sprayer.

BOOM CARRIER ASSEMBLY INSTRUCTIONS

21. Bolt the Boom Mounting Brackets (#18) to the rear of the frame as shown using four 1/2" x 1-1/4" hex head bolts (#16) and nylon locknuts (#22).

NOTE: The Boom Mounting Brackets and Boom Mounting Tubes may be mounted using any set of two holes depending on boom height desired.

22. Bolt the Boom Mount Brace Angles (#26) to the frame and the Boom Mounting Brackets (#18) using four 1/2" x 1-1/4" hex head bolts (#16) and nylon locknuts (#22).

23. Bolt the Boom Mounting Tubes (#37) to the back of the boom mounting brackets using four 3/8" x 2-1/2" square U-bolts (#19) and nylon locknuts (#25).

24. Attach the DBFT to the Boom Mounting Tubes using four 3/8" x 2-1/2" square u-bolts (#19) and 3/8" nylon locknuts (#25) then bolt the Truss Boom Center Section onto the DBFT using six 1/2" x 1-1/4" hex head bolts (#16) and 1/2" nylon locknuts (#22).

SAFETY STAND ASSEMBLY INSTRUCTIONS

25. Insert safety stand (#33) through holder (#32) before mounting onto boom bracket.

26. Attach safety stand holder (#32) to boom mounting tubes using a 3/8" x 2-1/2" sq. u-bolt (#19) and nylon locknut.

* FOR REFERENCE NUMBER LIST AND DESCRIPTION SEE PAGE 24

SAFETY STAND LOCK ASSEMBLY

27. Install lock spring (#24) and 1/2" flatwasher (#3) into small tube on safety stand holder (#32) as shown.

28. Insert Lockpin (#23) through tube into spring and lock washer.

29. Place 5/32" x 1" cotter pin (#10) between flatwasher and wall of tube into lock pin.

ASSEMBLY INSTRUCTIONS

(For electric control panel mounting location see page 19)

30. Bolt on manual panel mount (#7) using two 3/8" x 1-1/4" bolts (#1), flat washers (#3) and nylon locknuts (#2).

31. Insert lower valve mounting bracket (#5) into panel mount on frame and tighten 3/8" x 3/4" square head set screws (#6).

32. Slide PTO shaft holder (#11) and two panel mount collars (#12) over upper valve mounting bracket (#8) and insert into lower valve mounting bracket (#5). Bolt the two halves together with 5/16" x 1-3/4" bolt (#15) and nylon locknut (#16).

33. Tighten PTO shaft holder (#11) with 3/8" x 3/4" setscrew (#6) when you know where it goes.

34. Bolt female stabilizer braces (#13) to panel mount collars (#12) with 3/8" x 1" bolts (#4) and nylon locknuts (#2). Insert male stabilizer braces (#14) and secure to frame with 3/8" x 1" bolt (#4) and nylon locknut (#2), as shown. Tighten collars and braces with 3/8" x 3/4" set screws (#6).

35. Bolt the horizontal valve mounting bracket (#9) to upper valve mounting bracket (#8) using two 5/16" square U-bolts (#17) and nylon locknut (#16). Bolt mounting plate (#10) to mounting bracket using four 1/4" x 3/4" bolts (#18) and nylon locknuts (#19).

PANEL MOUNT PARTS LIST

REF. NO.	PART NO.	QTY.	DESCRIPTION
1.	00523	4	3/8"-16 UNC x 1-1/4" Hex Hd. Bolt
2.	02592	7	3/8"-16 UNC Nylon Insert Locknut
3.	00059	2	3/8" Flatwasher
4.	00907	3	3/8"-16 UNC x 1" Hex Hd. Bolt
5.	04934-76	1	Lower Valve Mtg. Bracket
6.	00095	7	3/8" x 3/4" Set Screw
7.	02148-76	1	Manual Panel Mount
8.	04933-76	1	Upper Valve Mtg. Bracket
9.	04935-76	1	Horizontal Valve Mtg. Bracket
10.	04936-76	1	Panel Mounting Plate
11.	05117-76	1	PTO Shaft Holder
12.	02145-76	2	Panel Mount Collar
13.	02147-76	2	Female Stabilizer Brace
14.	02146-76	2	Male Stabilizer Brace
15.	04759	1	5/16"-18 UNC x 1-3/4" Hex Hd. Bolt
16.	02802	5	5/16"-18 UNC Nylon Insert Locknut
17.	00909	2	5/16" x 1-1/4" Sq. U-Bolt
18.	01076	4	1/4"-20 UNC x 3/4" Hex Hd. Bolt
19.	02772	4	1/4"-20 UNC Nylon Insert Locknut

Please order replacement parts by **PART NO.** and **DESCRIPTION.**

NOTE: Thread sealant should be applied to all threaded fittings before assembly.

HYPRO BELT DRIVE PUMP MOUNTING

36. Begin by bolting the pump hanger (#1) to the sprayer tongue with 3/8" x 1-1/4" bolts, flat washers and nylon locknuts as shown.

37. Bolt Hypro pump mounting bracket(#2) to hanger using two 1/2" x 1-1/4" bolts, flat washers and nylon locknuts.

38. Next bolt pump (#3) to the bracket (#2) using two 3/8" x 1-3/4" bolts, flat washers, and nylon lock nuts.

39. For Electric Control Panels Only-

Bolt the PTO holder mount (#37) to the tongue using two 3/8" x 1-1/4" bolts (#4), flatwashers (#5) and nylon locknuts (#6). Insert PTO shaft holder (#38) into mount and secure with two 3/8" x 3/4" set screws(#39). Place 3/8" removable pin (#41) in holder along with small hairpin (#40). The drawing and parts breakdown are for installing the hoses and various components. Be sure to run 1-1/2" hose from the anti-vortex tank outlet fitting to the inlet side of the pump, 1" hose from the outlet side of the pump to the control panel, 3/4" hose from the panel to the agitators and 3/4" hose from the panel to the boom insert tees.

HYPRO BELT DRIVE PUMP PARTS LIST

* NOT INCLUDED ON ECONOMY MODELS

ACE CENTRIFUGAL HYDRAULIC PUMP MOUNTING

40. Begin by bolting the pump hanger (#1) to the frame with four 3/8" x 1-1/4" bolts, two flatwashers and four nylon locknuts as shown.

41. Bolt pump (#2) to hanger using two 7/16" x 1-1/2" bolts, flatwashers and nylon locknuts.

NOTE: Be sure to match hydraulic motor driven pump capabilities to your tractors hydraulic system.

ACE HYDRAULIC PUMP PARTS LIST

REF. NO.	PART NO.	QTY.	DESCRIPTION
1.	07207-76	1	Pump Hanger
2.	FMCHYD204	1	Ace Hydraulic Pump
3.	00523	4	3/8"-16 UNC x 1-1/4" Hex Head Bolt
4.	00059	4	3/8" Flatwasher

7.	00078	2	3/8" Lockwasher
8.	00079	2	3/8"-16 UNC Hex Nut
9.	00085	2	1/2" Flatwasher

Please order replacement parts by **PART NO.** and **DESCRIPTION.**

START-UP INSTRUCTIONS FOR CENTRIFUGAL PUMPS WITH MANUAL CONTROL PANEL

1. Run approximately 50 gallons of water in the tank.
2. Open the poly ball valve in the pump intake line. **Important: Remove top plug on pump to bleed all air from the suction line to the pump or damage will result to the seals. (Pump cannot be run dry).**
3. Close the wedge valve on the front of the control panel.
4. Close the wedge agitation valve on the control panel back.
5. Make sure the ratchet valve on the control panel back is in the open position.
6. Open the three manual valves on the control panel.
7. Start the pump and run at 540 RPM.
8. Open the wedge valve on the front of control panel until the gauge reads approx. 3 PSI over your desired spraying pressure with all three booms spraying.
9. Open the wedge agitation valve on the control panel until the gauge drops to your desired spraying pressure.
Example: If desired spraying pressure is 30 PSI open the wedge valve on the back of the control panel until the gauge reads 33 PSI. After this, open the wedge agitation valve on the control panel until the gauge drops back down to 30 PSI. (This is to insure the recommended pressure to the tank jet agitators).
10. Check for leaks.
11. Make certain all bolts and clamps are tight.

START-UP INSTRUCTIONS FOR CENTRIFUGAL PUMPS WITH ELECTRIC CONTROL PANEL

1. Run approximately 50 gallons of water in the tank.
2. Open the poly ball valve valve in the pump intake line. **Important: Remove top plug on pump to bleed all air from the suction line to the pump or damage will result to the seals. (Pump cannot be run dry).**
3. Close the wedge valve on the front of the control panel.
4. See "Panel Mounting and Operation" in Electric Control Panel Instruction Manual.

NOTE: Mount the Tee Valve (#19) to the Horizontal Valve Mounting Bracket (#9; on page 21) using two 3/8" x 1-1/4" hex head bolts (#29) and nylon locknuts (#30).

53.	02772	1	1/4" Nylon Insert Lock Nut
54.	00214	2	1/4" Flat Washer

55.	04055	1	1/4" x 1" Grd. 5 Hex Bolt
56.	04299	1	Roller Pump Chain w/ hook

OPTIONAL HANDGUN PARTS LIST

REF. NO.	PART NO.	QTY.	DESCRIPTION
42.	UV075FP	1	3/4" Poly Ball Valve
43.	BM3400	2	3/4" MPT Nipple
44.	BTT100	1	1" FPT Tee (GFP)
45.	B8H	2	1/2" Gear Clamp
46.	BEL3412	1	3/4" MPT x 1/2" Hose Barb Elbow
47.	D3412	1	3/4" MGHT x 1/2" Hose Barb
48.	2AAL60	1	15" Hand Spray Gun
49.	120RB	-	1/2" Rubber Hose

OPERATING INSTRUCTIONS

Begin operation by filling tank with liquid. Next, open the ball valve (A) and the ball valve (B) in the agitation line. Open the AA171 Tee valve (#19) and the by-pass valve (C). Start the pump. To regulate pressure, slowly close valve (C) until the desire pressure is attained. If adequate spraying pressure cannot be reached, slowly close the agitation valve (B) until the desire spraying pressure is reached.

NOTE: Roller pumps will wear after normal use and a drop in pressure can be expected. Simply reset the by-pass valve (C) to get the pressure back to normal.

NOTE: Each jet agitator in the tank requires a minimum of 3 GPM. Some roller pumps are limited in their capacity to spray and agitate at the same time.

(OPTIONAL CPTK1) QUICK REFILL PARTS BREAKDOWN & INSTALLATION

NOTE: Apply thread sealant to the fittings. Do not use sealant on external threads of tank outlet fitting.

QUICK REFILL (CPTK1) PARTS LIST

REF. NO.	PART NO.	QTY.	DESCRIPTION
1.	BM1140	2	1-1/4" MPT Nipple (GFP)
2.	BTT114	2	1-1/4" FPT Tee (GFP)
3.	A114-112	1	1-1/4" MPT x 1-1/2" HB (GFP)

Please order replacement parts by **PART NO.** and **DESCRIPTION.**

MOUNTING INSTRUCTIONS

45. Mount the mounting brackets (#2 & 3), using four 1/2" x 1-1/4" bolts, flatwashers and nylon locknuts, provided with foam marker.
46. Mount the electric control panel (#7) using four 3/8" x 1" bolts, lockwashers and nuts provided with CP414 control panel.
47. Mount handgun bracket (#11) using existing bolts already in tongue.

56 for Off White Rim

SPRAYER CALIBRATION PROCEDURES

NOTE: To avoid wind drift, use lower pressure and higher spray volume.

Guidelines For Sprayer Calibration

Before calibrating your sprayer, first determine whether each nozzle is delivering at a uniform rate. Place quart jars under all nozzles and watch as they fill up. The level should rise uniformly and take the same time (within 10%) for all nozzles to fill the jars. Replace any nozzle showing a discharge rate different from the others.

Calibrating the Sprayer

1. Mark off 660 feet (1/8 mile).
2. Fill the tank with water.
3. Set the sprayer to your desired operating pressure.
4. Turn the sprayer on and drive at the constant speed you will be spraying. Calibration on a road or unplowed field will give different results than on soft cultivated ground. **Note** tachometer reading so same speed can be maintained later.
5. Measure the amount of water it takes to refill the tank completely.

6. Calculate the amount applied:

$$\frac{\text{Number of gallons used} \times 66 (\text{factor})}{\text{Spray Swath in Feet}} = \frac{\text{Gallons applied}}{\text{per acre}}$$

Example: If 10 gallons are used in 660 feet and the spray swath is 40 feet, spraying rate is 16.5 gallons per acre.

$$\frac{10 \times 66}{40} = \frac{660}{40} \text{ or } 16.5 \text{ gallons per acre}$$

7. To calculate the amount of chemical to put in the tank:

$$\frac{\text{Sprayer Tank Size}}{\text{Desired GPA}} = \text{Acres covered} \text{ then;}$$

$$\text{Recom. amount of chemical per acre} \times \text{Acres covered} = \text{Amt. of chemical per tankful}$$

Example: If a 500 gallon tank is used and 16.5 gallons per acre are applied, one tank will cover 30.3 acres. If three pounds of chemical are required per acre, then 90.0 pounds of chemical are required per tankful.

$$\frac{500}{16.5} = 30.3 \text{ acres covered then;}$$

$$3 \text{ lbs. (gal.)} \times 30.3 = 90.0 \text{ lbs. (gal.) per tankful}$$

FLAT SPRAY NOZZLE FOR BROADCAST SPRAYING

Floodjet tips are positioned as shown in the diagram by the chart below. When positioning the tip as shown in Figure A the tip can be operated closer to the ground, thereby reducing the chance of wind drift.

The chart below shows capacities in gallons per acre at various speeds and liquid pressures. Capacities are based on water at 70 ° F. with nozzles spaced at 40".

The rate chart is based on 40 inch row spacings. For other spacings of nozzles on the boom, multiply the tabulated GPA coverage by the conversion factors shown below.

Other Spacing	20	24	28	30	32	34	36	38	40	42	44

Figure A

Downtime caused by field breakdowns is costly and time consuming. Many breakdowns can be eliminated by periodic equipment maintenance. By spending time reviewing this checklist before seasonal spraying application time and following proper after-season care, you can save time and money later.

Check Before Going To The Field :

WARNING: To Prevent Serious Injury Or Death

- **Keep hands, feet, and loose clothing away from rotating parts.**
- **Wear protective clothing recommended by your chemical and fertilizer manufacturer when working with chemicals.**

1. NOZZLES

Check tip for excessive wear by checking for grooves in or near tip opening. Check nozzle spacing by starting at center and working outwards. Check boom for proper height.

2. HOSES

Check all hoses for worn or soft spots. Be sure all hose clamps are tightened and hoses are not kinked or pinched. Check for leakage in any lines.

3. TANK

Remove and clean agitator orifices. Check orifices for excessive wear by checking for grooves in or near orifice opening. Inspect fitting and grommets to insure they are in good condition.

4. CONTROLS

Check for leakage, plugging, or wear on all valves, fittings, etc. Clean off any build up of foreign material.

5. PUMP

Check to be sure pump turns freely.

6. FRAME

Be sure all bolts are tightened.

7. REPLACEMENT PARTS

Replace all worn or damaged parts.

After Season Care:

NOTE: It is important to wear proper safety equipment when cleaning the sprayer. See your chemical or fertilizer package for this information.

1. After spraying chemicals, run water mixed with cleaners through tank, pump and all hose hookups. If wettable powder dries out in the system, it is very difficult to put back into suspension and can cause malfunction, damage or injury.
2. When cleaned, tank should have all openings closed or covered to keep dirt from entering.
3. Pump should be flushed with soluble oil and pump ports plugged to keep out moisture and air.
4. Disassemble tips and rinse with water or cleaning solution. (Appropriate for chemical sprayed).
5. Clean tip opening with a wooden toothpick. Never use wire or hard object that could distort opening.
6. Dispose of all unused chemicals or solutions in a proper and ecologically sound manner.
7. Water rinse and dry tips before storing.

NOTE: DETHMERS MANUFACTURING COMPANY does not and will not make any recommendations concerning application of various chemicals or solutions. These recommendations relate to either amount or procedure of materials applied. If you have any questions regarding application of certain chemicals or solutions, contact your chemical supplier and follow chemical manufacturer recommendations.
