

## “T” Bracket Installation

The T bracket configuration consists of two brackets. A right angle bracket called the 16 inch L bracket and the flat bracket called the 16 inch T bracket. Together they form a T when assembled as shown below

The bracket set attaches to the camper with the flat bracket parallel with the front and rear walls. The T bracket is set against the side wall.

Seal beneath brackets when installing with silicone or Seka-flex then secure with lag screws or bolt through to inside.
