

Updating NCSP3 and NCSP35

- 1) Go to <https://in-command.net/>
- 2) Hover your cursor over Control Systems at the top of the page, select iN•Command w/ Global Connect.
- 3) Hover your cursor over Software Downloads at the bottom of the page. Select **Display Commander OS**, **Display Commander App**, and **Body Control Module**. Each file will download, make sure you do not change the file names, place the files within folders, or unzip the zipped file. Move the downloads to your flash drive - you'll need no less than 1GB of storage. You should have three files on your flash drive.
- 4) Insert the flash drive into the bottom of your iN•Command display.
- 5) On the iN•Command display, select Settings.
- 6) Arrow down and select Software.
- 7) You should see DC/App/BCM Version. One at a time, select each version, then select Update in the top right corner.

DC Version: **1.2.35** App Version: **1.9.102** BCM Version: **1.01.70**
