

LIPPERT
COMPONENTS®

Purpose

NOTE: Information for this document was obtained from Kwikiee® Tip Sheet #82-ST0501, Rev 0B dated February 2014.

This document will assist in identifying the Kwikiee Step series number and part number, for steps built after late 2005 to the present. It will also assist in determining replacement part numbers for each step component.

Instructions

How to Read the Part Number Code

The following part number code information pertains only to step units built after February 1999.

Sample part number: 90XX0Y000

XX = 2 Digit Series Number

- For example, 22, 34, 40, etc.
- For special series steps, like the Revolution and Platinum series, refer to the Special Step Identification section in this document.

Y = General time frame

- If the sixth digit is a 6, 7 or 8, the step was built between early 1999 and late 2005 to early 2006. Steps built during this time period do not include the Integrated Motor Gear Linkage (IMGL) style motor, gearbox and control.
- If the sixth digit is a 9, the step was built after late 2005. The step will include the IMGL style motor, gearbox and control.

NOTE: The IMGL control has a distinct triangular shape at the end of the housing for mounting that can also assist in identification (Fig. 1).

Fig. 1

LIPPERT
COMPONENTS®

Standard Step Identification

To identify the standard step part number or series number, look for the Kwikkee label under the step on the mounting surface that attaches to the unit. The label will show the part number of the step. If necessary, extend the step to see the label.

There are different types of labels used on the steps. The following figures provide some examples.

The label shown in figure 2 shows part number 902806025.

- The third and fourth digits of the part number—2 and 8—indicate that this is a 28 Series step.
- The sixth digit—6—indicates that this step was built between 1999 and 2005.

The build date of October 17, 2003, shown in the upper right corner of the label (Fig. 2A), confirms this time frame.

NOTE: This step would **not** have originally had the IMGL (integrated motor/gear box/linkage) control components installed.

NOTE: The serial number, also shown on this label, cannot be used for identification.

LIPPERT
COMPONENTS®

In Figure 3, the label shows part number 903209025.

- The third and fourth digits of the part number—3 and 2—indicate that this is a 32 Series step. This label also shows 32 Series Step (Fig. 3A).
- The sixth digit—9—indicates that this step was built after late 2005 and equipped with the IMGL parts.

The build date of 01/11/12 printed on the side of the label confirms this time frame (Fig. 3B).

NOTE: This step part number will have the IMGL components installed.

LIPPERT
COMPONENTS®

Special Step Identification

NOTE: The following information pertains to the Revolution and Platinum Series steps.

The Revolution Series and Platinum Series steps do not have a series number as do the standard series steps. These steps will show only a step part number on the Kwikkee label.

- The label for the Revolution Series step will be located on the side of the step (Fig. 4). The step is identified with its part number.

- The label for the Kwikkee Platinum (camless) Series step will be located under the step on the mounting surface that attaches to the unit. If necessary, extend the step to see the label.
- The label will show the part number of the step (Fig. 5).

COMPONENTS®

Replacement Parts Tables

The following tables listing replacement part numbers are arranged by type of Step (Single, Double or Triple), then listed in order by step Series numbers and related step part numbers. Both Kwikiee and LCI component part numbers are provided for available replacement parts.

Kwikiee IMGL Replacement Parts by Step Series or Step Part Number					
Single Steps					
Series of Step	Part Number of Step	Frame Only Part Number	Gearbox Part Number	Motor Part Number	Step Control Box Part Number
