Introduction	2
Safety	2
Operation	3

Introduction

The Bed/Table Pedestal V2 is used for a table with an OEM-supplied tabletop attached, and then can be retracted for use as part of a system to create another bed.

Safety

Read and understand all instructions before installing or operating this product. Adhere to all safety labels.

This manual provides general instructions. Many variables can change the circumstances of the instructions, i.e., the degree of difficulty, operation and ability of the individual performing the instructions. This manual cannot begin to plot out instructions for every possibility, but provides the general instructions, as necessary, for effectively interfacing with the device, product or system. Failure to correctly follow the provided instructions may result in death, serious personal injury, severe product and/or property damage, including voiding of the Lippert limited warranty.

The “CAUTION” symbol above is a sign that a safety risk is involved and may cause personal injury and/or product or property damage if not safely adhered to and within the parameters set forth in this manual.

Moving parts can pinch, crush or cut. Keep clear and use caution.

Operation

Retract the table so the tabletop can function as a base in converting the area to a bed.

NOTE: The tabletop must be supported underneath in order to place a mattress on it to create a bed. The weight rating is dependent on the support structures used by the OEM.

1. Locate the latch on the side of the assembly (Fig. 1).
2. Release the latch with one hand and use the other hand to guide the tabletop while lowering it (Fig. 2) into the stowed position (Fig. 3).

⚠ CAUTION

Moving parts can pinch, crush or cut. Keep clear and use caution.

Fig. 1

3. The retracted table can now function as a bed base (Fig. 3).
4. To move back to the table position, lift up on tabletop. The latch is spring loaded so it will snap into place to hold the tabletop when the top is returned to the up position.
