

LEVELING AND STABILIZATION

An Electric Tongue Jack on the market produced by a competitor looks nearly identical to the LCI Power Tongue Jack (White - 181794, Black - 1817941). Customer interactions about the Electric Tongue Jack require verification of the LCI logo on the motor head and the shape of the mount plate.

1. The LCI Logo can be embossed in the motor head cover (Fig. 1A), or it can be a logo sticker placed into a depression in the motor head cover (Fig. 2). The sticker is removable (Fig. 3). The impostor will have a depressed circle with no LCI logo embossed (Fig. 4A), which will look exactly like the LCI jack with a missing sticker (Fig. 3). Inspect the mounting plate to compare the LCI jack to the impostor jack (Figs. 5 and 6).

LEVELING AND STABILIZATION

2. Verify mount plate is trapezoidal (Fig. 5). The impostor will have a circular mount plate (Fig. 6).
