

SLIDE-OUTS

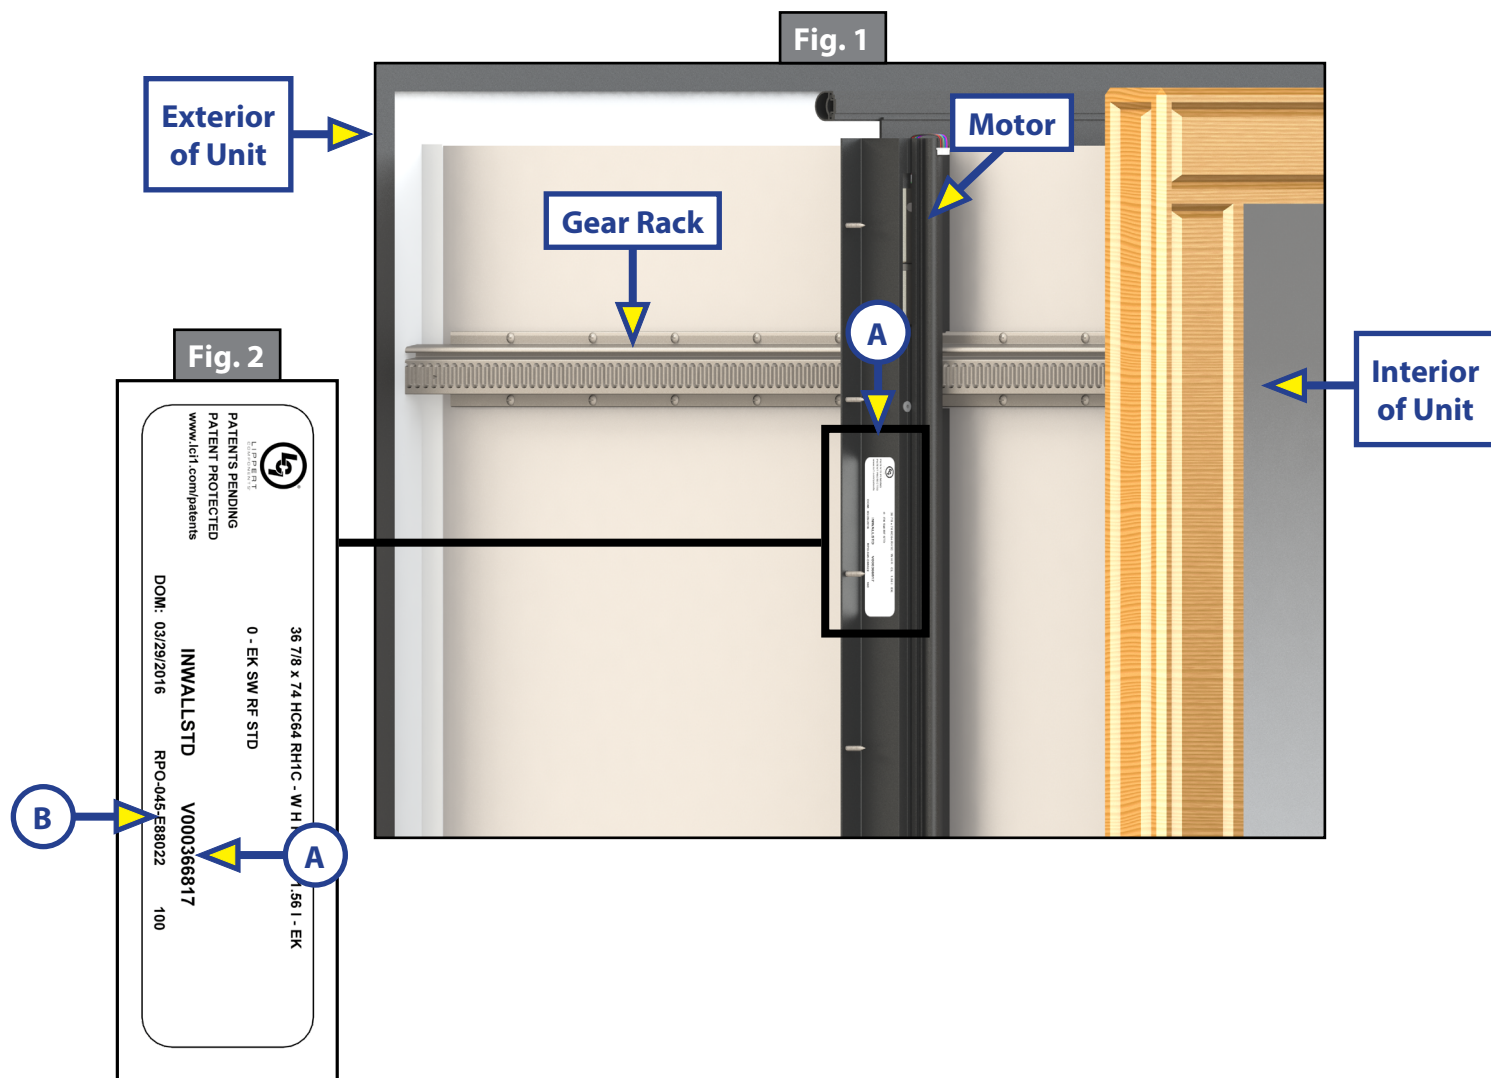

Purpose

The purpose of this document is to note the location of the label (Fig. 2) for In-Wall Slide-out systems.

Label Location

From the inside of the unit, the label (Fig. 1A) is located on the vertical column about 4 to 6" below where the motor sets and below the gear rack. Customers may need to pull back the wiper seal on the column to see the label (seal not pictured for clarity). For system identification, LCI uses the variant code (Fig. 2A) or RPO number (preferred) (Fig. 2B). On some older systems, the correct number to use starts with 2117 or 281.

NOTE: Taking a photo of the tag while the seal is held back may make reading the tag easier.

As a supplier of components to the RV industry, safety, education and customer satisfaction are our primary concerns. Should you have any questions, please do not hesitate to contact us at (574) 537-8900 or by email at customerservice@lci1.com. Self-help tips, technical documents, product videos and a training class schedule are available at lci1.com or by downloading the MyLCI app.
