Introduction

Kwikee® Step Well Covers are designed for front-entry coaches. The step well cover provides comfort and foot support for the person riding in the passenger seat. The step well cover also provides added user safety by preventing accidental falls into the entry step well.

The construction of the step well cover consists of three primary parts:

1. Outer Shell – The outer shell connects directly to the chassis of the motor coach and provides the structural support and environmental protection for the drive mechanism and slider.
2. Step Well Cover – The step well cover is the portion of the assembly that extends and that the user sees during normal operation.
3. Drive Mechanism – The drive mechanism is responsible for providing the power to drive the slider in and out.

Safety

Read and understand all instructions before installing or operating this product. Adhere to all safety labels.

⚠ WARNING

The "WARNING" symbol above is a sign that a procedure has a safety risk involved and may cause death or serious personal injury if not performed safely and within the parameters set forth in this manual.

⚠ WARNING

Failure to act in accordance with the following may result in death or serious personal injury. Read all operating instructions first before using your Kwikiee® Step Well Cover.

⚠ CAUTION

The "CAUTION" symbol above is a sign that a safety risk is involved and may cause personal injury and/or product or property damage if not safely adhered to and within the parameters set forth in this manual.

⚠ CAUTION

Moving parts can pinch, crush or cut. Keep clear and use caution.

Operation

⚠ WARNING

Do not stand on the step well cover during operation.

Extend

To extend the Step Well Cover:

1. Make sure there are no obstructions in the entry step well (Fig. 1) which will interfere with the operation of the system.
2. Locate the step well cover rocker switch (Fig. 2) and position yourself fully inside the coach. Do not stand in the entry step well.

Fig. 1

Fig. 2

3. Press and hold the rocker switch in the OUT position until the system is fully extended and stops moving.
4. Verify that the step well cover (Fig. 3A) is fully extended by visually checking to see that it is level and parallel to the main floor and top edge of step well (Fig 3B).

Fig. 3

Retract

To retract the step well cover:

5. Make sure there is nothing laying on top of the step well cover.
6. Locate the step well cover rocker switch (Fig. 2) and position yourself fully inside the coach.
7. Press and hold the rocker switch in the IN position until the step well cover is fully retracted and stops movement.
8. Verify that the step well cover is fully retracted (Fig. 4A) by visually checking to see that it is flush with the back part of the step well (Fig. 4B).
