

LEVELING AND STABILIZATION

Purpose

The purpose of this document is to outline the battery requirement for the Lippert Leveling system.

Battery Requirements

A 12V automotive/marine/RV approved battery with a minimum rating of 500 CCA, 625MCA, and/or at least 60 AH is required to use the leveling system or landing gear legs on RVs with Lippert Leveling systems installed.

Failure to do so may cause unnecessary system errors that require recalibration.

As a supplier of components to the RV industry, safety, education and customer satisfaction are our primary concerns. Should you have any questions, please do not hesitate to contact us at 432-LIPPERT (432-547-7378) or by email at customerservice@lci1.com. Self-help tips, technical documents, product videos and a training class schedule are available at lippert.com or by downloading the LippertNOW app.
