Solera® Super Shade

Installation and Owner's Manual

(For Aftermarket Application)

Introduction

The Solera® Super Shade for Electric Awnings is the only recreational vehicle awning shade made specifically for 12V awnings. It is simply the easiest shade to set up on the market today. The Super Shade can be used on Solera awnings as well as Carefree awnings and Dometic awnings. It's perfect for awnings that provide little shade because they roll out flat. The open-weave fabric cuts approximately 85% of light for a cool and comfortable shade. It provides some privacy without blocking your view and doubles as a windbreak.

The Solera Super Shade for Electric Awnings comes in two pieces: a 6' body (below the zipper) and an insert.

Additional information about this product can be obtained from www.lci1.com/support or by downloading the free MyLCI app. The app is available on iTunes® for iPhone® and iPad® and also on Google Play™ for Android™ users.

⚠ WARNING

IF STAKING SOLERA SUPER SHADE TO THE GROUND, BE SURE TO DISABLE ANY AND ALL SELF RE-TRACKING WIND SENSING OPTIONS ON THE AWNING. FAILURE TO DO SO COULD RESULT IN DAMAGE TO THE AWNING AND UNIT.

⚠ CAUTION

MOVING PARTS CAN PINCH, CRUSH OR CUT. KEEP CLEAR AND USE CAUTION.

Resources Required

- 1 to 2 Persons

Installation

1. Unbox and unfold the Solera Super Shade body and the zipper insert. Unzip the insert piece from the body and set the body piece aside.
2. Locate and trim the polycord so that at least 3" of polycord extends past the fabric on both sides (**Fig.1**).

Fig.1

3. Locate the open channel in the awning roll tube accessible through the end cap.
4. Check the roll tube channel to make sure there are no sharp edges that can snag or tear the fabric.

NOTE: For Solera and Carefree awnings, align the roll tube channel with the front side of the drive/idler head (**Fig.1 and Fig.2**). This allows the insert piece to slide more easily into the roll tube channel.

(For Aftermarket Application)

5. Using the polycord, slide the insert piece into the roll tube channel, making sure not to snag the insert (**Fig.2**).

Fig.2

NOTE: The easiest way to install this insert piece is to have one person hold the insert even with the roll tube, while another person pulls the insert into the roll tube channel.

6. Once the insert is located in the center of the roll tube, affix the insert piece with self-adhesive hook and loop fabric to the roll tube on both ends. This will hold the insert in place when zipping on the body portion of the Super Shade (**Fig.3**).

NOTE: The other section of hook and loop fabric is sewn into the insert piece (**Fig.3**).

Fig.3

7. Take the body of the Super Shade and zip it to the insert piece (**Fig.4**).

Fig.4

8. Stake the shade to the ground with the tie downs and stakes provided.

NOTE: To remove the Super Shade for storage, remove the spikes and tie downs and unzip the body panel of the Super Shade. Fold to fit in the storage bag provided. The insert piece can remain on the roll tube and roll up with the fabric when the awning is retracted.
