

ELECTRONICS

The use of Sway Command® is only supported/allowed for use on trailers meeting product specifications and trailers with approved brake control modules (BCMs) and integrated trailer brake control modules (ITBCMs). See trailer requirements and approved BCM and ITBCM Lists at:

<https://www.lci1.com/sway>

THE USE OF LCI'S SWAY COMMAND® WITH 2014-2020 GM TRUCKS AND SUVS EQUIPPED WITH AN INTEGRATED TRAILER BRAKE CONTROL MODULE (ITBCM) COULD CAUSE REDUCED BRAKING EFFECTIVENESS, INDUCE LOSS OF BRAKE CONTROL AND INCREASE THE RISK OF INJURY WHEN TOWING A TRAILER.

When LCI's Sway Command® is functioning on a trailer, the subject GM truck will display "Service Trailer Brake System" in the vehicle message center, the ITBCM will become disabled and the electric trailer brakes will not function until the ignition has been turned off and back on to clear the code.

DO NOT USE LCI'S SWAY COMMAND® WITH 2014-2020 GM TRUCKS AND SUVS EQUIPPED WITH AN ITBCM WHILE TOWING A TRAILER.
