

Tie Downs - *Four CA-UR Install*

Tacoma Bumper

The general mounting locations are the same for all small trucks. Locate the rear anchor as far back as possible on the bumper at a location where the slide on clip will turn freely and the under side can be accessed to secure the washers and nut.

Locate the front anchors within 4" of the front of the bed in the lower panel where the panel is most flat and vertical.

(Be sure to check the back side for obstructions before drilling.)

Tacoma

Tacoma Front Anchor

Note: The truck shown above is a 2014 Toyota Tacoma and the dimensions given are for this truck only.
