

STEPS

Purpose

The purpose of this document is to provide installation instructions for the Victory Step™ Garage Mount kit (Fig. 1).

⚠ CAUTION

Do NOT suspend steps above floor-level. Above floor-level suspension of steps can cause property damage. Use garage storage brackets to secure and properly store steps.

The garage storage brackets are NOT designed to hang the Victory Step on the wall while suspended above the floor. Suspending the Victory Step above the floor could lead to wall damage. The garage storage brackets are designed to hold the Victory Step in a fixed position for travel where the feet of the step are resting on the floor and the step is slightly leaning towards and latched onto the brackets.

Fig. 1

Resources Required

- Cordless or electric drill or screw gun
- Appropriate drill bit
- Appropriate drive bit
- Appropriate fasteners

Prior to Installation

Before installing the brackets, adjust the feet of the Victory Step to their shortest position (Fig. 2A). This will help ensure that, after the garage storage brackets are properly attached to the wall, there will never be any situation where the garage storage brackets cause the step to be suspended above the floor.

Fig. 2

STEPS

Installation

1. Attach each garage storage bracket assembly to the step latches on the Victory Step (Fig. 3).
2. Make sure the step latches click into place around the clevis pin (Fig. 3A).

Fig. 3

3. Position the Victory Step with the feet on the floor and the garage storage brackets leaning against the wall at the desired storage location (Fig. 4).

Fig. 4

4. Position the edge of the feet about 3 to 4 inches away from the wall. This will help ensure that the Victory Step will always lean against the wall and never hang from it.
5. Without changing the position of the Victory Step, install appropriate fasteners (not included) through the top hole in each garage storage bracket.
6. Remove the Victory Step from the garage storage brackets to access the bottom hole of each garage storage bracket.
7. Install fasteners through the bottom hole of each garage storage bracket.

STEPS

Operation

Storage

1. Make sure both feet on the Victory Step are set to the same height adjustment.
2. Attach the Victory Step latches to the clevis pins (Fig. 5A) on the garage storage brackets.
3. Make sure both step latches click into place around the clevis pins (Fig. 3A) and both feet are on the ground (Fig. 4).

Fig. 5

Removal

To remove the Victory Step, push both step latch levers up (Fig. 6A) then lift and pull the step away from the clevis pins.
