

Dear Valued Monaco Motor Home Customer:

As the manufacturer of your model year 2016-2019 Monaco Class A motorhome, REV RV wants to reach out to you with some important information relating to your leveling system.

Enclosed are two independent topics in this mailing:

- 1) Lippert Components Inc. (LCI)/Power Gear would like you to review leveling jack inspection opportunities for the Power Gear leveling system on your motor home.
 - Lippert/Power Gear wants you to look at your jacks for evidence of excessive fluid (see enclosed for details). If this topic does not apply to your vehicle, simply email or call your findings (along with pertinent information outlined on the enclosed) to Lippert/Power Gear. **Email customerservice@lci1.com or call 574-537-8900.**

- 2) REV RV has provided an Owner Notification letter and reply card relating to a newly published **Product Upgrade Bulletin #190312REV** relating to the leveling hoses at the rear cap area of your motor home. The REV RV reply card enclosed, only relates to the Product Upgrade for hydraulic leveling hoses at the rear of your motor home.
 - REV RV Product Upgrade #190312REV requires that you provide clear photos. **Email Monaco RV Owner Relations mcctech@revrvgroup.com or call (800) 509-3417**

We want to thank you for your purchase of a Monaco product and appreciate your understanding regarding this mailing. We have an approved dealer network ready to assist you in the event you are directed to seek further assistance.

Sincerely,
REV RECREATION GROUP, INC.
