

MOR/ryde Pin Box Identification Guide

Trailer Information

Make: _____ Model: _____ Year: _____ Total Trailer Weight: _____ lbs.

Customer Name: _____ Phone Number: _____

What type of Pin Box do you have?

- A. Look on the pin box to locate the manufacturer's label. Common manufacturers are: Atwood, Fabex, Leland, Lippert, RBW, Venture and Young's Welding.
Mfg : _____
- B. After locating the label, locate the model/part number.
Example: Leland P/N AF 7910. P/N : _____
- C. If a manufacturer's label can not be located, get the last six digits of the coach serial number, call the coach manufacturer and ask them what make and model pin box was installed on your coach.
- D. If you are unsuccessful in acquiring the information above get the following measurements and a MOR/ryde representative will help in determining which pin box you need.

Pin Box Measurements

1. What style of pin box do you have? (Fig. 1) (circle one)

Long, Medium, Telescoping (34°/45°/72°), Short

2. Measure the bolt hole pattern. (Fig. 2)

- _____ 2a: Horizontal distance between the rows of bolts, measure from hole center to hole center.
 _____ 2b: Vertical distance from hole center to hole center.
 _____ 2c: If there are three rows of bolt holes, measure horizontal distance from hole center to hole center.
 _____ 2d: Bolt size.
 _____ 2e: Bolt head size.
 _____ 2f: Number of bolts per side.

3. Measure king pin center. (Fig. 3)

- _____ 3a: Measure from center of the front row of bolts to the centerline of the king pin. The telescoping and short style pin boxes may have the king pin located behind the front row of bolts. If the hole pattern is at an angle, use the centerline of the second lowest front hole to measure to the center of the king pin in the retracted position.
 _____ 3b: Measure from center of the rear row of bolt to centerline of the king pin.
 _____ 3c: Measure the overall width of the pin box.

4. Double check your measurements.

- _____ 3b - 3a = 2a Note: 3a is negative when the king pin is behind the first row of holes.
