How to read the part number code:

(This only pertains to units
built after February 1999)

SAMPLE: 90XX0Y000

XX = 2 Digit Series No.
Y = Time frame

If this 6th digit is a "6
thru 8", then that
indicates it was built
between early 1999,
and late 2005 to early
2006.

CONTINUED ON PAGE 2

This sheet is to assist in identifying the Kwikee step model # and part #, for steps built after late 2005 to present. It will also assist in determining replacement part numbers for each step component.

STANDARD STEP IDENTIFICATION

To identify the standard step part number or series number, look for the Kwikee label under the step on the mounting surface that attaches to the coach. The label will show the part number of the step.

You may have to have the step extended to see the label. Below are a couple examples of different labels used on the steps.

EXAMPLE 1:

- This label shows the part #902806025.
- The 3rd and 4th digits of the part number indicate this is a 28 series step.
- The 6th digit indicates this step was built between 1999 and 2005.

We can confirm this time frame by the build date of October 17, 2003, shown in the upper right corner of the label.

- This step would not have originally had the IMGL components installed.

NOTE: The serial number cannot be used for identification.

If this is a “9”, then it indicates it is built after late 2005, and has the Integrated Motor Gear Linkage (IMGL) style motor, gearbox and control.

The IMGL control has a “triangular” shape at the end of the housing for mounting that can also assist in identification (see photo below).

EXAMPLE 2:

Part Number 903209025

- This label shows the part #903209025.
- The 3rd and 4th digits of the part number indicate this is a 32 series step.
- It also shows the “32 Series Step” (circled) on the label.
- The 6th digit indicates this step was built after late 2005 and equipped with the IMGL parts.

We can confirm this time frame by the build date of 1/11/12 printed on the side of the label (see enlarged picture).

- This step part number will have the IMGL components installed.

SPECIAL STEP IDENTIFICATION

This information pertains to the Revolution and Platinum Series Steps.

- The Revolution Series and Platinum Series steps do not have a series part number as described above.
- These steps will have a part number only on the Kwikkee label.
- The label for the Revolution step will be located on the side of the step as shown below. The step is identified with this part number.
- The label for the Platinum (camless) step will be located under the step as described in the previous section.

EXAMPLE 3:

Part Number 9010000464 Revolution Step

Part Number 9010000220 Platinum Step
