Consumer's hitch receiver depth?

To ensure proper fit, it's important to know the depth of your receiver. Determine this by doing the following:

- With a ruler inserted in the receiver, measure from the center of the hitch mounting hole to the point where you make contact with an obstacle. **This is your receiver depth.**
- If you do not contact a back-stop or your hitch receiver does not have a backstop, another potential point of contact could be an undercarriage-mounted spare tire or the undercarriage itself.
- Using the table in the next page, compare your measurement to see which hitch racks will work with your vehicle.

Your receiver depth must be equal to or greater than the product measurement listed in the table for a proper fit.

	Hitch Rack	Receiver Depth

Technical information

Consumer's hitch bumper clearance?

Make sure your bumper will not interfere with the Thule hitch rack. Measure the distance from the center of the mounting hole on your hitch to the end of your bumper.

This is your bumper clearance.

Your bumper clearance must be equal to or less than the product measurement listed in the table for a proper fit.

Consumer's spare tire clearance?

If you have a spare tire on the back of your vehicle it may interfere with the installation of your Thule hitch rack. Measure the distance from the center of the mounting hole on your hitch receiver to the end of your spare tire.

This is your spare tire clearance.

Your spare tire clearance must be equal to or less than the product measurement listed in the table for a proper fit.

Consumer's garage clearance?

If you will be parking your vehicle in a garage with the rack mounted, you can use these measurements to help you determine if there will be any interference issues with fitting your vehicle into your garage space with the rack in the stowed position or deployed position.

Thule Access 9037

Failure to follow **WARNINGS**, **THULE GUIDELINES** or **PRODUCT INSTRUCTIONS** could result in the following: **DAMAGE TO VEHICLE, PROPERTY DAMAGE AND SERIOUS PERSONAL INJURY OR DEATH.**

Warnings

- Do not exceed the HITCH manufactures **MAX TONGUE WEIGHT** capacity.
- This accessory is rated for **Class 3** or greater 2" receiver hitches only.

**Class 3 to 5
2" Receiver**

**Class 1 to 2
1.25" & 2" Receiver**

With load centered less than 18" from Access pin hole, do not exceed 350 lbs max capacity.

With load centered greater than 18" from Access pin hole, do not exceed 250 lbs max capacity.

- This product is not for towing use.
- Do not use on towed vehicle.
- Do not use this product on RV's or trailers.
- This product is not approved for off-road use.

- Always use the safety strap, do not operate if damaged or missing.
- Keep hands away from **PIVOTING AREAS**.
- Do not allow children in the work area of this product when not in use.
- Do not attempt to move vehicle with adapter in open position.

Caution!

- Confirm the product you intend to use is approved for use on Thule Access.
- Do not use this product upside down.
- Periodically check tightness of Thule Access in vehicle receiver.
- Make sure your rack and receiver are in good working order before use.
- Must mount to your vehicles receiver directly. Do not use hitch extenders.
- Do not take through automatic carwash.
- Obey all traffic posted traffic laws when using this product.
- The added distance and weight will amplify deflection. Drive responsibly.
