

Door Systems

Providing the Big
Picture Solutions!

TriMark Corporation

Designing a full door system solution requires a wide range of high-quality products working together to form a rugged, reliable system. As a world leader in vehicular door hardware, TriMark's products sets the standard in excellence, design and value in the field. We take pride in the details, such as opening/closing efforts, structural support, appearance, safety, security, easy of assembly, quality, durability, and overall value.

Bottom Line

TriMark Can Offer a Full Range of Platform and Product Access Solutions!

Rotary Latch:

The rotary latch is the heart of the door access system, TriMark's feature the highest level of quality, security and strength to meet virtually any application.

Exterior Handle:

TriMark's wide variety of exterior handles take into consideration: style, functionality, mounting/space claim and security.

Interior Releases:

Today's door designs demand ergonomic placement and ease of function for the inside release. Considerations include: style, functionality, mounting, installation, materials and finish.

Rods/Cables:

TriMark excels at remote releases, utilizing rods or cable connections. Our rods and cables efficiently transfer mechanical input from the operator and enable quick and safe operation.

Power Lock Actuator:

TriMark's power lock actuators provide an electrically powered lock/unlock function with consideration for integration into mechanical products as well as facilitating mechanical override.

Keyless Entry:

For additional convenience, functionality and safety, our comprehensive selection of components and systems allow for complete keyless entry, security and ignition control for vehicles and equipment.
