Assembly Coordinator:

This position provides assistance and work direction to assigned assembly personnel in a manner that ensure the most productive use of time. The candidate ensures that production schedules are met and accurately enters all production data accurately and in a timely manner into the company wide software. This position also assists with the daily functions of the department while maintaining department quality and workforce safety. The position maintains a motivated and participative work force. The candidate assists with the development of the Assembly Department goals; trains, coaches and motivates employees to grow to their maximum potential.

Warehouse Utility:

To accurately receive, verify and accept shipments of parts/supplies and maintains and processes all assigned documents in a current and complete status. To prepare all outgoing goods for prompt and accurate shipment according to established procedures, timetables and special instructions. To locate and stage inventory as required for sub-contract and production. To move material from one department to another, meet operational flow, or locate into inventory when required. To locate and do physical count of parts as a basis for maintaining accurate inventory levels; to ensure a smooth flow of material through the facility.

Assembler:

Completes assembly operation on any product in a safe manner consistent with established quality standards and production schedules. The position must read blueprints, work and special instructions. The candidate will assist other team members with the setup and daily execution of the cell and its detailed process. The position is responsible for final inspection, function checks and packaging for the customer.
