Easy Upgrade and Installation

Our WF-8900REP converter replacement kit allows easy upgrade of existing power centers. Technicians can easily remove the lower section of certain power center brands and slide in the WF-8900REP unit. This exchange upgrades the old single stage charger to a high-performance three-stage charging powerhouse.

With 40 years of power equipment experience, WFCO knows what is important to our customers. To make installation easy, WFCO's complete replacement kits for 35 Amp, 45 Amp, and 55 Amp units

include the converter, a new DC fuse board, and required fasteners. King models are UL* and cUL* listed and FCC Class B compliant.

Reliability. Vertically integrated, WFCO has total supply chain control, ensuring quality materials, parts, and processes at each stage. Components are quality tested at critical manufacturing stages resulting in zero faults at the final 4-hour burn-in test, helping keep warranty claims below 1%. All models are UL* and cUL* listed and FCC Class B compliant.

EASY INSTALLATION

All WFCO models are designed with the installer and assembly line in mind. We work with installers every day to find ways to streamline installation to reduce time and fiddle factor.

The kit consists of the converter/charger mounted into a metal bracket to make installation easy as an upgrade or replacement for multiple brands of power converters.

All fasteners are included.

SMART ENGINEERING: THREE-STAGE CHARGING IS BETTER. WFCO's automatic three-stage converter handles every charging need for the RV while extending the battery's life. Well-maintained batteries should never need more than two-stage (Normal and Trickle) charging. Our third stage (Bulk) is provided for the rare times a battery needs extra-power for charging.
