HOW TO PROVIDE LIGHTING PROTECTION

FOR TV ANTENNA AND SET

STEP 1. Mount the lightning arrester as close as possible to where the downlead enters the house.

STEP 2. The ground wires for both the mast and the downlead should be copper or aluminum wire, number eight (8) or larger.

STEP 3. The downlead wire from the antenna to the lightning arrester should be secured every four (4) to six (6) feet to prevent whipping.

NOTE: In the case of a "ground up" antenna installation, it may not be necessary to ground the mast if the mast extends four or more feet into the ground. Consult a TV serviceman for proper depth in your location.

*** NOTICE: If you require a longer U-bolt (4.00") order part # 1160322.**
