

Quick Start Guide

GM-9000 | GM-9035

Manuel disponible en français au
www.winegard/support

1) Set the Switches

Settings are factory pre-set for DIRECTV®. For any other programming provider set according to the diagram:

2) Install the Handle

With "WINEGARD" on the handle facing upwards, align the two holes in the handle with the two holes in the base. Thread the two provided screws from hardware bag through the two aligned holes in the bottom of the handle. Tighten the two screws using a Phillips screwdriver. **Do not overtighten.**

3) Choose a Location

Choose a location with a clear, unobstructed view of the southern sky. Avoid obstructions such as trees, hills, vehicles, or buildings — these can block the signal from the satellite.

4) Wire the Antenna

With the power button on the power inserter in the OFF position (not pressed in), connect the primary port of the Carryout G3 to the ANTENNA port on the power inserter with the 25' coaxial cable. With your fingers, twist the cable on, and tighten a quarter turn more with a wrench. **Do not overtighten.**

Connect the "SAT IN" port of your satellite receiver to the "RECEIVER" port of the power inserter with the 3' coaxial cable. With your fingers, twist the cable on, and tighten a quarter turn more with a wrench. **Do not overtighten.**

5) Power On and Scan

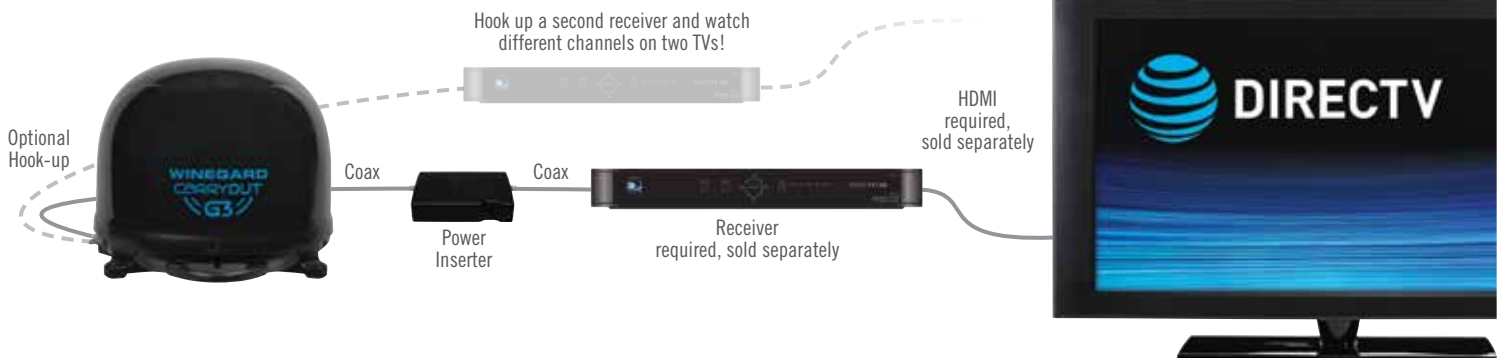

Plug the power adapter into 110/120VAC outlet and connect to the power port on the power inserter (next to RECEIVER coax port).

Press the power button on the power inserter, wait approximately 3-5 minutes to scan. When the antenna is completely quiet, set up receiver for desired programming.

Refer to manual for setup instructions or check out online receiver setup guides for your antenna at www.winegard.com/receivers/setupguide.php. For more information on receiver compatibility and programming, visit www.winegard.com/receivers.

6) Watch

With the program guide downloaded, you are ready to watch TV!
