

# COMMON SOLAR WIRING FOR MULTIPLE 12v BATTERIES

When wiring a solar kit to multiple batteries, it is important to remember that your batteries are wired together. To gain the most from your solar kit, be sure to place the positive wire on the first battery in the sequence and the negative wire on the last battery in the sequence. This is true regardless of the number of batteries in the bank.

## HOW TO

How **TO** wire a solar charge controller for 2 batteries

How **TO** wire a solar charge controller for 3 batteries

## HOW NOT

How **NOT** to wire a solar charge controller for 2 batteries
